

ANDRO VALERO

Full Stack Developer

Lima - Peru

Portfolio: <https://androvaleroportfolioweb.netlify.app/> · **Email:** avalerom@uni.pe

GitHub: github.com/E-RI-CK · **LinkedIn:** [linkedin.com/in/andro-erick-valero-medina](https://www.linkedin.com/in/andro-erick-valero-medina) · **Phone:** +51 940560235

Professional Summary

Full Stack Developer with 4 years of experience developing scalable web applications using **React**, **Next.js**, **TypeScript**, and **JavaScript (ES6+)**. Experienced in building complex user interfaces, data visualization dashboards, and real-time applications using **WebSockets**. Knowledgeable in **Node.js**, **Express**, and the development and integration of **REST APIs**, as well as working with **SQL** and **NoSQL** databases. Focused on performance optimization, application architecture, maintainable code, and software development best practices, working in agile environments and using **Git** for version control.

Professional Experience

Frontend Developer – Astay Systems

May 2024 – January 2026

- Implemented real-time mining metrics using WebSockets and data visualization libraries, reducing chart loading times by **50 %**, **from 8s to 4s**, and improving operational monitoring.
- Optimized **React/Next.js** dashboards by reducing unnecessary re-renders, decreasing filter-related errors (days, shifts, etc.) by **40 %**.
- Integrated **Unity WebGL** with **Next.js** to enable interactive **3D** visualization, developing polygon drawing tools and block model manipulation features to improve operational analysis and decision-making.
- Migrated the **Marcobre** web application from **React.js** to **Next.js**, refactoring components, restructuring routing, and ensuring compatibility with existing **APIs**, improving overall performance.
- Deployed and managed production environments on **AWS EC2**, ensuring system stability and availability.

Full Stack Developer – Kashio

January 2024 – February 2024

- Optimized **REST** services in **Node.js**, reducing response times by **65 %**, **from 6s to 2s** in key operations.
- Implemented centralized error handling and validation, reducing the time required to detect and resolve production bugs by **40 %**.
- Fixed critical issues in the payment platform, reducing customer-reported incidents by **90 %** and improving system stability.
- Developed reusable **React** components, reducing development time for new features.
- Structured the backend using a layered architecture (**controllers, services, and data access**), improving maintainability.

Frontend Developer – Liberte Marketing

February 2023 – April 2025

- Improved technical **SEO** across websites, increasing organic search visibility by **60 %** and expanding service exposure.
- Optimized frontend performance and **SQL** databases, reducing page load times by **30 %** and improving the user experience.
- Reduced **10 hours** of manual work per week by integrating forms, webhooks, and automation into internal processes.
- Developed and customized websites using **WordPress** and **Angular**, including theme and plugin development and customization, improving page load times and user experience.

Education

Bachelor's Degree in Computer Science

Universidad Nacional de Ingeniería

2017 – 2023

Technical Skills

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn UI, Material UI

Data Visualization: Chart.js, Recharts, ApexCharts

State Management: Redux Toolkit, Zustand

Backend: Node.js, Express, NestJS, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS EC2, Docker

Tools: Git, GitHub, Postman, Figma, Jira, Miro

Agile Methodologies (Scrum): Daily stand-ups, task prioritization, and collaborative sprint planning.

Testing: Jest, React Testing Library

Languages

English: (Professional reading, technical documentation, and technical communication)
